

TAKETE-IDE AMURO

Website Development Documentation Pack

Heritage • Unity • Progress

Purpose — A build-ready blueprint for design, development, content, governance, verification, launch and long-term maintenance of the Takete-Ide Amuro community website.

Prepared from the initial community material and landing-page concept • 12 August 2026

Document Control

Item	Working decision
Project	Takete-Ide Amuro Community Website
Location	Mopamuro Local Government Area, Kogi State, Nigeria
Working tagline	Heritage • Unity • Progress
Document status	Build-ready planning pack; historical claims marked for verification
Recommended MVP	Public heritage/development website + secure editorial admin
Primary governance principle	Community-controlled ownership and multi-person publishing authority

Contents

- 1. Executive Summary

- 3. Product Requirements
- 4. Sitemap & Information Architecture
- 5. Page-by-Page Content Specification
- 6. Design System & Component Library
- 7. Technical Architecture
- 8. CMS & Data Model
- 9. Admin Portal & Permissions
- 10. SEO, Analytics & Performance
- 11. Accessibility, Privacy & Security
- 12. Historical Research & Content Governance
- 13. QA & User Acceptance Testing
- 14. Deployment & Launch
- 15. Maintenance & Governance
- 16. Roadmap & Backlog
- 17. Registers & Templates
- 18. Initial Fact Verification Matrix
- 19. Definition of Done
- 20. Official Technical/Policy References

1. Executive Summary

The Takete-Ide Amuro website should be built as the community's trusted digital home, not simply as a promotional homepage. Its strongest long-term value is the combination of cultural preservation, an evidence-led historical archive, annual Takete-Ide Day records, transparent development updates and connection with residents and diaspora members.

Recommended launch position — Launch with excellent public content and a controlled admin workflow. Keep online payments, open directories and unmoderated public submissions out of the first release until governance, privacy and financial controls are approved.

Recommended MVP

- Responsive public website
- Our Story and heritage archive
- Traditional Institution
- Takete-Ide Day archive by year
- Development projects and updates
- News and announcements
- Gallery and document library
- People & achievements with approved criteria
- Diaspora connection page
- Contact form
- Privacy, accessibility, editorial and corrections policies
- Secure admin portal with draft/review/publish workflow
- Source and verification tracking for historical content

Recommended build stack

Layer	Recommendation	Why
Application	Next.js App Router	Structured routing, layouts and modern rendering patterns for public/admin pages
Styling	Tailwind CSS + reusable components	Fast implementation of the approved design system
Database	Supabase Postgres	Structured community, event, project and archive content
Authentication	Supabase Auth	Administrator identity integrated with the data layer
Media	Supabase Storage	Centralised image/document storage with access policies
Hosting	Vercel	Git-based production and preview deployments

2. Project Vision, Audiences & Scope

Vision

Create the trusted digital home of Takete-Ide Amuro: preserving heritage, connecting generations, documenting development and providing a reliable community archive for residents, diaspora members, students, researchers, journalists and future generations.

Strategic objectives

- Preserve history, culture and institutional memory.
- Create an authoritative source for community information.
- Archive Takete-Ide Day celebrations and documents by year.
- Document development priorities and verified progress.
- Showcase approved achievements without political or family bias.
- Enable authorised editors to maintain content without touching source code.
- Improve search discoverability using original, sourced community material.

Audience matrix

Audience	Primary need	Key content
Residents	Useful current information	News, events, projects, contact
Diaspora	Connection and trustworthy updates	Projects, events, volunteering, archive
Young people	Identity and learning	History, oral history, people, gallery
Researchers/media	Citable provenance	Sources, dates, archive, correction route
Leadership/editors	Controlled publishing	Admin workflow, approvals, audit trail

MVP boundaries

In MVP	Later / only after approval
Public pages and archive	Online donation/payment processing
Admin publishing	Public personal directory
Project updates	Member voting/elections
Contact form	Open comments/forum
Source tracking	Complex genealogy/private family records

3. Product Requirements

Core visitor journeys

1. Arrive from search/social → understand community identity → choose history/event/project/gallery.
2. Open Takete-Ide Day → choose a year → see programme, photos, speeches and verified outcomes.
3. Open Projects → filter/browse → read evidence-backed status updates.
4. Open Our Story → follow timeline and topics → see clearly attributed sources/traditions.
5. Open Contact → send a safe enquiry with clear expectation of how data is used.

Core editorial journey

1. Contributor creates draft and adds sources/media metadata.

2. Editor checks accuracy, style, rights and completeness.
3. Historian/verifier checks historical claims where required.
4. Publisher approves and publishes.
5. Audit record stores significant action; content can later be archived or corrected.

Functional requirements

Area	Requirements
Content	Pages, news, events, projects, gallery, people, documents, sources
Search/discovery	Metadata, sitemap, internal links, optional site search Phase 2
Forms	Contact plus optional private contribution/volunteering forms
Admin	Authentication, roles, preview, workflow, audit
Media	Upload, caption, alt text, rights, credit, album association
History	Claims linked to evidence and verification status

4. Sitemap & Information Architecture

Navigation	Route	Purpose
Home	/	Identity and highlights
Our Story	/our-story	History overview and timeline
Heritage	/heritage	Culture, institution, oral history
Takete-Ide Day	/takete-ide-day	Annual event archive
Projects	/projects	Development priorities and updates
News	/news	Announcements and reports
Gallery	/gallery	Photo/video archive
Diaspora	/diaspora	Connection and skills contribution
Contact	/contact	Enquiries and corrections

Secondary routes

- /heritage/traditional-institution
- /heritage/culture
- /heritage/oral-history
- /heritage/digital-archive
- /takete-ide-day/[year]
- /projects/[slug]
- /news/[slug]
- /people and /people/[slug]
- /privacy
- /accessibility
- /editorial-policy
- /corrections
- /admin/*

5. Page-by-Page Content Specification

Home

- Hero: Takete-Ide Amuro; Heritage • Unity • Progress; location

- Welcome / short community introduction
- Feature cards: Rich Heritage, Annual Festival, Community Development, Diaspora Connection
- Heritage + Traditional Institution
- Takete-Ide Day highlights
- Building the Future: roads, education, health
- Moments from Takete-Ide gallery strip
- Get involved CTA

Our Story

- Overview of evidence-led history
- Origins and settlement
- Relationship within Amuro
- Agriculture and livelihoods
- Christianity and education
- Self-help/community development
- Timeline with source notes

Heritage

- Traditional institution
- Culture and customs
- Oral history
- Digital archive
- Source/corrections guidance

Takete-Ide Day

- Overview
- Year selector/archive
- Year detail template: theme/date/venue/guests/programme/awards/projects/gallery/documents/sources

Projects

- Project cards by status/category
- Project page with problem, owner, status, timeline, updates, evidence and approval
- No fundraising figures unless formally approved

People & Achievements

- Transparent inclusion criteria
- Categories across leadership, education, business, public service, health, culture, sport, diaspora and youth
- Evidence + consent/rights

Diaspora

- Community connection
- Skills/volunteering expression of interest
- No default public directory
- Privacy-controlled future participation

Contact

- Name, email, category, message
- Spam protection
- Privacy notice link
- Correction/history submission routes

Core homepage copy

Takete-Ide Amuro

Heritage • Unity • Progress

A historic community in Mopamuro Local Government Area, Kogi State, Nigeria.

Takete-Ide Amuro is a proud community shaped by heritage, family, faith, agriculture, education and a long tradition of collective development. This website preserves our story, celebrates our people and connects Takete-Ide at home and across the world.

Publication rule — Use this copy as working copy. Replace broad historical statements with sourced language as the verification process produces evidence.

6. Design System & Component Library

Working visual identity

Token	Hex	Use
Deep Purple	#3B155D	Brand, headings, footer
Heritage Gold	#C99718	Accent and CTA
Community Green	#2F6B43	Development/land accent
Warm Ivory	#FFF8EC	Background
Charcoal	#2A2730	Body text
Muted Grey	#6C6672	Secondary text

Design rules

- Authentic Takete-Ide photography first; generic stock only where unavoidable.
- No more than two font families.
- Use gold as accent, not small low-contrast body text.
- Mobile-first; content remains legible without decorative effects.
- Cards and shadows should support hierarchy, not dominate it.
- Preserve ceremony/event context; do not fabricate documentary imagery.

Component inventory

- Header/nav
- Hero
- Breadcrumbs

- Section title
- Feature/stat card
- Heritage card
- Event/year card
- Project card/status badge
- News card
- People profile
- Gallery/lightbox
- Document card
- Source note
- CTA band
- Footer
- Form controls
- Admin tables/status toolbar

Landing-page concept

Concept reference only: final imagery, text, logo/emblem use and historical statements require approval.

7. Technical Architecture

Layer	Build decision	Implementation notes
Web app	Next.js App Router	Public routes + protected admin; server-first where possible
UI	Tailwind + component layer	Use design tokens and reusable accessible

Layer	Build decision	Implementation notes
		components
Database	Supabase Postgres	Content, source records, project/event/archive data
Auth	Supabase Auth	Admin identities; connect to role profile
Storage	Supabase Storage	Images/documents; track metadata in database
Security	Postgres RLS + server validation	Defence in depth; least privilege
Deployment	Vercel	Git-based preview → production workflow

Repository shape

/app /(public) /admin /api
 /components /ui /content /admin
 /lib /supabase /auth /validation /seo
 /types /public /tests

Environment policy

- Local, preview/staging and production environments.
- Separate secrets; never expose service-role keys to the browser.
- Prefer production data separation from experimental preview data.
- Record owner and rotation/recovery path for every secret.

8. CMS & Data Model

Entity	Purpose	Important fields
pages	Static/editorial pages	slug, title, body, status, SEO, publish dates
news_posts	News	slug, title, excerpt, body, category, publish date
events	Takete-Ide Day and events	year, dates, venue, theme, content
projects	Development initiatives	category, status, owner, dates, visibility
project_updates	Progress evidence	date, body, evidence doc
gallery_albums	Photo collections	title, year, cover, status
media_assets	Images/documents	caption, alt, credit, rights, consent
people_profiles	Approved people pages	category, bio, achievement, consent
traditional_rulers	Historical ruler archive	title, reign, bio, verification
oral_histories	Interviews	interviewee, date, transcript, consent
sources + claims	Historical provenance	source details, claim, verification, links
content_reviews	Approval workflow	reviewer, decision, note, date
audit_logs	Governance/security	actor, action, object, timestamp

Key design decision — Store historical evidence separately from page prose. This allows a claim to be corrected or reclassified without losing the source trail.

9. Admin Portal & Permissions

Role	Key capability
Viewer	Read authorised admin content
Contributor	Create drafts and upload media
Editor	Edit assigned sections and review routine content
Historian/Verifier	Review sources and historical verification
Publisher	Approve/publish/archive

Role	Key capability
Administrator	Users, settings and full system access

Admin dashboard priorities

- Drafts awaiting review
- Media missing alt text/rights
- Historical claims awaiting verification
- Projects needing update
- Recent publications
- Recent admin activity
- Contact submission count without exposing message content unnecessarily

10. SEO, Analytics & Performance

Search topics

- Takete-Ide Amuro
- Takete Ide Kogi State
- Takete-Ide Day
- Takete-Ide history
- Takete-Ide Mopamuro

Technical SEO

- Descriptive titles and meta descriptions
- Canonical URLs
- XML sitemap and robots rules
- Meaningful internal links
- Open Graph/social preview metadata
- Structured data only where truthful
- Original community content and source attribution

Performance benchmark

Metric	Good target
LCP	≤ 2.5 seconds
INP	≤ 200 ms
CLS	≤ 0.1
Evaluation	75th percentile of visits

11. Accessibility, Privacy & Security

Accessibility target — Build and test toward WCAG 2.2 Level AA.

Accessibility checklist

- Semantic heading order
- Keyboard navigation
- Visible focus
- Alt text for meaningful images
- Sufficient contrast
- Labels and clear form errors
- Reduced-motion support
- No colour-only meaning
- Captions/transcripts where appropriate
- Adequate touch target size

Privacy baseline

The Nigeria Data Protection Act 2023 is the baseline Nigerian data-protection framework for the site. Apply data minimisation, purpose limitation, access control, retention and transparent notices. Other jurisdictions may apply depending on future services and the location of users; obtain legal advice before complex membership, payment or international-processing features.

Security baseline

- HTTPS only
- MFA where available
- Least-privilege roles
- RLS on exposed data
- Server-side validation
- Rate limiting/anti-spam
- Upload type/size allow-list
- Dependency updates
- Secret scanning
- Backups and tested recovery
- Audit logging
- Formal admin offboarding

12. Historical Research & Content Governance

Verification state	Meaning
Verified	Reviewed documentary evidence supports the statement
Documented secondary	Reputable published evidence; primary record not yet confirmed
Oral history	Attributed recorded testimony
Community tradition	Presented explicitly as tradition
Unverified	Do not publish as factual history

Initial research questions

- Exact origin/migration narrative
- Any 1926 relocation claim
- Any 1919 Christianity-introduction claim

- Early missionary/church history
- Agojo bell story and any 1939 date
- Full list of Olude and reign dates
- TIPU formation, constitution and logo authority
- Origin/first year of Takete-Ide Day
- Criteria/evidence for notable people

Source hierarchy

1. Community signed records/minutes
2. Traditional institution records
3. Church/school registers
4. Government archives/publications
5. Established newspapers/media
6. Family archives with provenance
7. Oral histories
8. Unsourced social/search snippets

Governance recommendation — Create a Takete-Ide Digital Heritage & Website Committee. Technical administrators should not have sole authority over historical truth, political inclusion or financial publication.

13. QA & User Acceptance Testing

Test group	Examples
Functional	Navigation, content pages, admin, workflow, forms, media, errors
Accessibility	Keyboard, headings, focus, labels, contrast, zoom, mobile targets
Content	Names, dates, spelling, citations, captions, verification
Security	Roles, protected routes, secrets, uploads, rate controls
Performance	Mobile images, page weight, layout shift, Core Web Vitals
Cross-browser	Chrome, Edge, Safari, Firefox; mobile/tablet/desktop

UAT sign-off owners

- Community content
- Traditional/history content
- Visual design
- Technical readiness
- Privacy/contact process

14. Deployment & Launch

Pre-launch gate

- Community-owned domain/account confirmed
- Production database/storage ready

- At least two trusted admin recovery paths
- Backup/export tested
- Privacy/accessibility/editorial/corrections pages published
- Contact routing tested
- Metadata/sitemap/robots reviewed
- Social preview tested
- Broken-link scan passed
- Mobile UAT signed off
- Historical approvals recorded
- Image rights reviewed

Launch sequence

1. Freeze approved content
2. Take pre-launch backup/export
3. Deploy production build
4. Run smoke tests
5. Verify domain/canonical URLs
6. Configure search/analytics tooling
7. Announce through approved channels
8. Monitor errors and form delivery for 72 hours

15. Maintenance & Governance

Cadence	Action
As required	News and announcements
Monthly	Material project updates
After annual event	Takete-Ide Day archive update
Quarterly	Admin access + backup recovery review
Monthly	Dependency/security review
Annually	Accessibility, privacy and policy review

Community asset ownership

- Domain registrar
- Git repository/organisation
- Hosting
- Database/storage
- Official email
- Analytics/search tooling

16. Roadmap & Backlog

Phase	Outcome
0 — Governance & discovery	Ownership, steering group, domain, brand, verification plan
1 — MVP	Public site + CMS/admin + archive foundations
2 — Archive growth	Oral history, document library, rulers/timeline
3 — Participation	Moderated submissions, diaspora skills, optional newsletter

Phase	Outcome
4 — Support/fundraising	Only after financial/governance/privacy controls

MoSCoW priority

Must	Should	Could	Won't yet
History, heritage, events, projects, gallery, news, contact, admin, source tracking	People, document archive, project timelines, richer metadata	Search, interactive timeline, map, multilingual	Open comments, public directory, elections, uncontrolled uploads

17. Registers & Templates

The accompanying ZIP contains editable CSV registers and Markdown templates so the build can be managed like a real product project rather than a one-off design exercise.

- Asset register
- User stories and acceptance criteria
- Roles/permissions matrix
- Risk register
- Indicative project timeline
- Fact verification register
- Historical fact submission template
- Oral history template
- Photograph intake template
- Project update template
- Person profile template
- Takete-Ide Day annual record template

18. Initial Fact Verification Matrix

Topic	Working claim	Decision before publication
Community name	Takete-Ide Amuro	Use as working official name; confirm preferred hyphenation/spelling
Location	Mopamuro LGA, Kogi State, Nigeria	Safe working location statement; confirm exact ward/district wording if needed
Traditional ruler title	Olude of Takete-Ide Amuro	Verify official styling and current office holder before publication
Agrarian character	Community described as agrarian	General wording acceptable once community approves
Takete-Ide Day	Annual socio-cultural/community event	Verify origin year, official purpose and annual programme
Christianity date	Claim of introduction in 1919	Do not publish as fact until documentary/church evidence reviewed
Relocation date	Claim of move in 1926	Do not publish as fact until corroborated
Agojo bell	Claim involving May 1939 and imported bell	Treat as oral/history research lead until source checked
TIPU	Takete-Ide Progressive Union exists/has emblem	Confirm legal/constitutional status, mandate and logo rights

19. Definition of Done

- All planned routes implemented and responsive.
- No placeholder copy remains.
- Public historical claims follow verification policy.
- Every meaningful image has alt text/caption/rights metadata as applicable.
- Admin roles enforce least privilege.
- Preview/review/publish workflow works.
- Contact form and privacy notice are tested.
- Accessibility checks and keyboard journeys pass the agreed standard.
- Core Web Vitals and image performance are reviewed on real mobile conditions.
- Backups and rollback are tested.
- Community content and traditional/history content are signed off by named owners.
- Repository, domain and core services have documented community ownership/recovery.
